

### Why Therma-Tru?

- Therma-Tru offers an industry-leading product line of fiberglass and steel doors, glass and components backed by decades of experience and technical know-how.
- Therma-Tru introduced the world to fiberglass doors and remains committed to innovation, making new products that are better and more beautiful every year.
- Therma-Tru delivers the added benefit of programs designed to support projects with quick lead times, and Therma-Tru® fiberglass door systems are backed by the industry's most comprehensive warranty.
- Therma-Tru works closely with an industry-leading national network of fabricators to deliver custom solutions and reliable performance to homeowners.
- Year after year, Therma-Tru is preferred by more builders and remodelers than any other entry door brand.\*

\*Brand Use Studies, 2014 *Builder* and 2013 *Remodeling* magazines.

### Why Fiberglass?

With very little maintenance, a fiberglass door can bring a home years of beauty, durability and energy efficiency. Therma-Tru® fiberglass doors offer the authentic look of wood. But, unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust. Built with a polyurethane foam core, Therma-Tru® fiberglass doors insulate against cold and heat for exceptional energy efficiency.

#### Security

- Therma-Tru® fiberglass doors are built with enhanced lock blocks that provide proper handleset reinforcement, combined with lock and hinge stiles that increase rigidity and stability.
- Therma-Tru® fiberglass door systems offer an adjustable security strike plate that is tested to withstand up to three times the force of standard strike plates.\*

\*ASTM-476. As tested by an independent laboratory. Not available on certain configurations.

- While steel doors are generally perceived as the most secure against forced entry, Therma-Tru® Smooth-Star® fiberglass doors with security strike plates exceeded the industry's highest level test standard by 40%.\*

\*ASTM F-476 Section 18 Grade 40. As tested by an independent laboratory. Not available on certain configurations.

#### Energy Efficiency

- Therma-Tru® fiberglass doors are thermally broken, meaning they insulate against cold and heat. Steel-edged, steel doors are thermally conductive, resulting in higher thermal losses in steel-edged products. In other words, cold temperatures can penetrate inside and heat can penetrate outside, or vice versa depending on the season.
- The polyurethane foam core in Therma-Tru® doors offers as much as four times the insulating R-Value of wood.\*

\*Comparison of fiberglass to wood doors, both without glass.

#### Performance

- Fiberglass skins provide durability and long-term performance. A fiberglass door will not dent or rust, nor will it warp, split, crack or rot. And a fiberglass door requires less maintenance than wood or steel doors.
- Wood absorbs moisture, so it can peel, bow, warp, rot or twist. Wood is also vulnerable to fading from sunlight.
- Steel can dent or scratch, and scratches can lead to rust. Steel is also prone to paint chipping.

#### Aesthetics

- Therma-Tru® fiberglass doors have the authentic look of real wood. It's virtually impossible to tell the difference.
- Compared to steel, the embossment detail on fiberglass doors is far richer.
- Steel is cold to the touch, while fiberglass has the warm look and feel of wood.

## Why Therma-Tru® Door Systems?

A Therma-Tru® door with genuine Therma-Tru components is more than a beautiful door – it's a complete door system. One that offers uncompromising quality, inside and out. Therma-Tru manufactures or specifies every aspect – from the glass to the hinges – all engineered with craftsman precision for durability and reliability through the years. So you can be confident that it will perform as exceptionally as it looks.

### Quality Testing

Therma-Tru® doors, glass and components are held to high standards. Therma-Tru conducts thorough testing to guarantee that the products will live up to a homeowner's toughest quality and performance expectations.

### Energy Efficiency

In any region or climate, energy efficiency is key. More than 90% of Therma-Tru® door and glass options are ENERGY STAR® qualified and National Fenestration Rating Council (NFRC) certified, helping save money on energy costs.

Here are some of the features that help Therma-Tru doors earn their ENERGY STAR® qualified rating:

- A polyurethane foam core. Therma-Tru® fiberglass doors offer up to four times the insulating R-Value of wood doors due to their solid polyurethane foam core.\* This essentially creates an energy-efficient entrance to the home, helping stabilize interior temperatures.
- Energy-efficient glass. Most Therma-Tru® decorative and privacy glass features triple-pane construction, creating an exceptional thermal and acoustical barrier. Factory-coated Low-E glass, available as an option, delivers exceptional energy efficiency.
- Complete door systems. Therma-Tru® doors are designed as complete systems with components that are engineered to work together to help maximize the seal between the door and frame. By helping to keep heating and air conditioning sealed in the house, a complete door system can provide a boost to home energy efficiency.

\*Comparison of fiberglass to wood doors, both without glass.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on ENERGY STAR® qualified products.

ENERGY STAR is a government program that helps consumers protect the environment through superior energy efficiency and is a registered trademark of the U.S. Department of Energy and the U.S. Environmental Protection Agency.

### Lifetime Limited Warranty

Therma-Tru stands behind more parts of a door system for longer than other door companies because they make or specify everything that goes into it. A Therma-Tru fiberglass door system is backed by the industry's most comprehensive lifetime limited warranty.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions.

### Tru-Defense® Door Systems

- Therma-Tru fiberglass doors are available with the exclusive Tru-Defense® door system, which integrates specific components engineered and tested to deliver outstanding protection in all kinds of weather conditions.
- It's backed by a Warranty Rider for homeowner peace of mind that provides for cash reimbursement up to \$2,000 that may be used toward secondary damage to flooring and trim, and the labor to make repairs, if water infiltration occurs.\*

\*For full details on the Tru-Defense Warranty Rider, visit [www.thermatru.com/trudefense](http://www.thermatru.com/trudefense). The Rider does not warrant workmanship of anyone who assembles or installs a Tru-Defense door system, nor any damages caused by improper handling, assembly or installation.

### Impact-Rated Products

Therma-Tru® Impact-rated doors and glass offer excellent protection to meet the harsh demands of extreme weather conditions in coastal areas, while providing added security.

- Constructed to endure flying debris and high-velocity winds associated with tropical storms and hurricanes.
- Tested to meet codes and regulations in coastal areas, including Florida, Texas and the Carolinas.\*
- Pass a large missile impact test, preventing penetration of a 9 lb. 2" x 4" stud at 34 mph.

#### Impact-Rated Doors:

- Many Classic-Craft®, Fiber-Classic® and Smooth-Star® fiberglass doors can be ordered with an HVHZ Impact-rated option, featuring a built-in 24-gauge steel plate lining that helps protect the home from weather-related damage.
- Impact-rated fiberglass doors with the optional steel plate lining are engineered to withstand wind forces up to 236 mph (DP-100).\*\*

### Impact-Rated Glass:

- Multiple decorative and clear glass lites for Fiber-Classic®, Smooth-Star®, Profiles™ and Traditions fiberglass and steel doors can be ordered with an Impact-rated option, featuring special laminated glass construction that helps protect the interior of the home.
  - Fifteen Impact-rated decorative glass designs are available in some of the most popular glass sizes.
- Impact-rated glass lites with the optional laminated glass construction are engineered to withstand wind forces up to 195 mph (DP-65) when installed in an approved Therma-Tru® HVHZ Impact-rated door\*\*\* and up to 167 mph (DP-50) in a Therma-Tru® non-HVHZ Impact-rated door.
- Impact Lip-lite frame is constructed of aluminum for superior durability.

\*Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru Impact-rated product approval. Visit [www.thermatru.com](http://www.thermatru.com) for product approvals and full details on WBDR- / HVHZ-compliant products. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

\*\*Impact and structural performance of a single Classic-Craft® door.

\*\*\*Impact and structural performance of a single Therma-Tru® fiberglass door with multi-point locking system.

### Privacy Concerns

Homeowners who want to let more natural light into their home but have concerns about privacy can rest assured that their concerns are addressed with Therma-Tru privacy glass and internal blinds for doors and sidelites.

Privacy Glass: All Therma-Tru® entry door collections and sidelites can be fitted with four elegant privacy glass designs – Chord, Chinchilla, Rainglass and Granite. Each of them enhances a home with privacy, peace of mind and the beauty of textured glass, while still allowing natural light to brighten the interior.

- Varying opacity levels range from 8-10 to find the right balance of privacy and light for the home.
- All privacy glass options are triple-pane, providing added security, thermal efficiency and reduced sound transmission.
- Triple-pane construction also allows for an easy-to-clean surface.

Internal Blinds: Internal blinds provide the privacy and convenience of a cordless blind enclosed between glass. Control the desired level of light and privacy with the simplicity of a single handle.

- Protected between two panes of tempered glass for enhanced safety and performance.
- With no dangling cords, this is a kid- and pet-friendly choice.
- Blinds remain dust free, and glass is easier to clean than traditional blinds.

### Visualization Tools

- Picture Perfect™ 2.0 Virtual Designer – Therma-Tru's popular door visualization offering includes the Picture Perfect™ 2.0 software, which lets homeowners imagine the impact a new entryway will have on their home's curb appeal. This user-friendly interactive tool allows homeowners, working with a Therma-Tru® dealer, to "virtually" see how a new door will look on their actual home after it is installed. The homeowner also receives a detailed summary to keep.
- *Build Your Door* – Therma-Tru makes it easier for homeowners to research and shop for entry doors with the *Build Your Door* tool on [www.thermatru.com](http://www.thermatru.com), all from the convenience of home at any time of day or night. The interactive tool includes social features that allow users to save, compare, rate and share their favorite configured entry door systems to assist in the selection process. Visit [www.thermatru.com/mysaveddoors](http://www.thermatru.com/mysaveddoors).
- DoorWays™ App – Available on the App Store for iPhone and iPad, the DoorWays™ App allows homeowners to choose from a wide selection of fiberglass door and glass combinations to create an entrance that fits their style. They can use the camera to try the different combinations on their home, save multiple options with product information included for easy lookup, and share their favorite looks with friends via email, text and Facebook.

### Return on Investment

*Remodeling* magazine's Cost vs. Value Report ([www.costvsvalue.com](http://www.costvsvalue.com)) evaluates the relationship between remodeling costs and resale value to determine which projects give homeowners the greatest return on their investment.

- According to the *Remodeling* magazine Cost vs. Value Report ([www.costvsvalue.com](http://www.costvsvalue.com)), entry door replacement consistently ranks among the most valuable remodeling projects.
- The results of the study reinforce an important message: Enhancing your entry door will likely add to your home's curb appeal and potentially boost its perceived value – important in today's housing market.

©2014 Hanley Wood, LLC. Complete data from the *Remodeling* 2014 Cost vs. Value Report can be downloaded free at [www.costvsvalue.com](http://www.costvsvalue.com).

## Curb Appeal & Perceived Value

Consumers believe an attractive front entrance not only adds to a home's curb appeal, but can also boost its perceived market value.

- In a survey of homebuyers, 2,400 consumers were asked to estimate the value of various homes based on exterior appearance. The study found that consumers believed that a home with an enhanced front entrance added to its perceived value by as much as five times the cost of the entry system installation.\*
- At a time when homeowners are looking to get the most out of every dollar they spend on their home, installing an attractive new front entrance is a cost-effective investment that can have a big impact.

\*The "National Home Valuation Study" was commissioned by Therma-Tru in 2002 and conducted by TNS, an independent provider of Internet-based research and research-based marketing information and counsel.

## Why Therma-Tru® Decorative & Specialty Glass Collection?

A Therma-Tru® door system with decorative glass can create an entrance that makes a statement – one that says the homeowner has high standards for style, quality and craftsmanship.

### Inspirational Designs

- With various glass colors, textures, shapes and coming options – designed with varying home styles in mind – Therma-Tru's glass portfolio helps create a stunning look to enhance any entryway.

### Engineering Expertise

- Therma-Tru has decades of experience and technical know-how in creating seamless glass and high-performing door systems.
- Rigorous testing and evaluation helps ensure the glass and complete door system meet high quality and performance standards.
- Therma-Tru glass is backed by a lifetime limited warranty when installed in a fiberglass door system.

### Market Knowledge

- Therma-Tru's continual market research uncovers glass styles that meet the look and performance expectations of the homeowner.
- Therma-Tru glass designs are highly rated in consumer preference to ensure that they satisfy customer needs.
- Therma-Tru is constantly working to understand changing building regulations and code compliance to provide products that meet or exceed industry standards.

### Portfolio Breadth

- Therma-Tru's 27 decorative glass designs, and four privacy glass options, complement various home styles and homeowner desires.
- Divided lite options can complement the windows and architectural style of a home.
- Internal blinds provide privacy without hassles or safety concerns.
- Low-E glass offers outstanding energy efficiency, and more than 90% of Therma-Tru door and glass options are ENERGY STAR® qualified.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions, and ENERGY STAR® qualified products.

## Why Therma-Tru® Door System Components?

A Therma-Tru® door with genuine Therma-Tru® components is more than a beautiful door – it's a complete door system. One that offers uncompromising quality, inside and out.

### Durability & Reliability Through the Years

- Unlike other door companies, Therma-Tru manufactures or specifies every aspect of the complete door system – door panel, glass, components – to their high standards.
- A Therma-Tru® door system is engineered with craftsman precision to provide weather resistance and energy efficiency.
- More than 90% of Therma-Tru® door and glass options are ENERGY STAR® qualified, contributing to an energy-efficient home.

### Engineered to Work Together

- Therma-Tru specifies all of the components to work together at the most critical points where a door can fail, letting in air and moisture.
- By forming a tight seal against drafts and leaks, these components can help protect the door and home against costly damage and deterioration.

### Backed by Therma-Tru's Lifetime Limited Warranty

- Therma-Tru can stand behind more parts of a door system for longer than other door companies because they make or specify everything that goes into it.
- A Therma-Tru fiberglass door system is backed by the industry's most comprehensive lifetime limited warranty.

### Offered in a Variety of Choices

- Therma-Tru provides a wide selection of component options to meet the needs of different applications and climates.
- Premium features offer enhanced protection against the damaging effects of air and moisture infiltration.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions, and ENERGY STAR® qualified products.

## Why Classic-Craft® Premium Entryways?

- Glass Options: 16 decorative, four privacy, specialty, Low-E and clear glass options available.

### Traditions

- The Traditions steel door line combines attractive designs and value-based options to create a great, cost-conscious alternative for multiple front entry and house-to-garage configurations.
- Features 25-gauge steel, standard embossed smooth surface – primed white and ready-to-paint. All 8'0" doors are 24-gauge steel with standard embossments.
- Door Sizes: 2'0", 2'4", 2'6", 2'8", 2'10" and 3'0" widths in 6'6", 6'8" and 8'0" heights.
- Glass Options: Decorative, privacy, specialty, Low-E and clear glass available.

## Fire-Rated Doors

From smooth to grained, Therma-Tru has products to meet most national and local code requirements for house-to-garage, multi-family residential and hotel / motel unit entries.\*

- Therma-Tru offers an industry-leading selection of fiberglass 20-Minute Fire-rated doors, as well as 20-minute Fire-rated steel options, for protection with a sense of style.
  - All Therma-Tru® solid-panel fiberglass wood edge doors – Classic-Craft, Fiber-Classic and Smooth-Star – can be ordered as 20-Minute Fire-rated product, featuring a proprietary cement-based core.
  - Solid-panel steel wood edge doors in select sizes can be ordered with the 20-Minute Fire-rated label.
  - The doors are tested to withstand a minimum of 20 minutes of fire exposure at temperatures that reach more than 1,400 degrees Fahrenheit.
  - Therma-Tru® 20-Minute Fire-rated doors are certified and approved for use with mortise locks.

- Therma-Tru® TR 12–24 Steel Edge 90-Minute Fire-rated doors and door systems provide outstanding protection.
  - Constructed with 24-gauge steel edges and tested to withstand at least 90 minutes of fire exposure at temperatures that reach more than 1,700 degrees Fahrenheit, the doors are perfect for multi-family living and house-to-garage projects.
  - Available in a variety of door styles, sizes and lock preparations, the units are suitable for a minimum 4" wall depth or greater.
  - Therma-Tru also offers all the necessary components – frame, weatherstrip, bottom sweep and sill – to complete a 90-Minute Fire-rated door system.

\*To confirm fire door requirements in your jurisdiction, always check with your local building code authority.

Note: To see the full results of third-party Intertek, Warnock Hersey testing, visit [www.thermatru.com/performance](http://www.thermatru.com/performance).

## Pulse®

Modern design. Upbeat living. Clean lines. Crisp angles. Sleek designs. Vintage style. Discover Pulse. A contemporary series of door styles and glass designs that can be combined to make a bold statement.

It's your decision, by design. Pulse is geometry with energy. Designed to be fun and easy to mix and match. You can create a modern entrance without missing a beat. Explore all the possibilities.

- With four distinct aesthetic approaches – Ari, Línea, Echo and Solei – the entrance becomes modern art.
- Sleek, flush door styles in 2'6", 2'8", 2'10", 3'0" and 3'6" widths by 6'8" and 8'0" heights, and 10", 12" and 14" sidelites.
- Material choices include wood-grained fiberglass in Mahogany and Oak, as well as smooth fiberglass and steel.
- Available with privacy and Low-E glass, internal blinds for Línea and Solei, and 12 decorative glass designs for Línea.
- Ready to stain or paint any color. There's no limit to the creativity.
- Lifetime limited warranty – fiberglass doors and glass; 10-year limited warranty – steel doors and glass.
- Many ENERGY STAR® qualified options.
- WBDR- (Wind-Borne Debris Region) compliant options available.

## Patio Door Systems

Extend the beauty and quality of a Therma-Tru® entrance to the back of the home with hinged patio doors. Smart options to control the level of privacy and light, complement window patterns and let fresh air into the home offer convenience and curb appeal that's unsurpassed from any view.

### Hinged Patio Door Systems

- Fiberglass or steel patio doors in grained or smooth textures can be stained or painted to match the home.
- NEW for 2014 internal blind options offer the privacy and convenience of a cordless blind enclosed between glass.
- NEW for 2014 divided lite options in a variety of patterns, colors and textures complement the home's window patterns.
- Flush-glazed glass options offer a seamless appearance and wider daylight opening.
- Factory-coated Low-E glass options increase the energy efficiency of the entrance.
- Available Door Selections: Classic-Craft® Mahogany, Rustic, Oak and Canvas Collections; Fiber-Classic® Mahogany and Oak Collections; Smooth-Star®; Profiles™ and Traditions.
- Available Sizes: 5'0"– 9'0" widths in 6'6", 6'8", 7'0" and 8'0" heights.
- Available Configurations: Single patio, double patio / French or triple patio units for inswing and outswing applications.
- Available Glass Designs: Internal blinds, simulated divided lites (SDLs), contour or flat grilles between glass (GBGs), Low-E and clear glass are available.
- Lifetime limited warranty – doors and glass.
- Many ENERGY STAR® qualified options.
- Many fiberglass door and sidelite styles are WBDR- (Wind-Borne Debris Region) compliant. Many Fiber-Classic®, Smooth-Star®, Profiles™ and Traditions doors with glass are available with options to upgrade to WBDR- and / or HVHZ- (High Velocity Hurricane Zone) compliant.\*
- Tru-Defense® Warranty Rider eligible when properly assembled and installed with all Therma-Tru® specified system components, in accordance with the Rider.

## Vented Sidelites

- Constructed to provide ventilation without sliding screens blocking the view, vented sidelites work as small swinging doors with convenient removable screens.
- Engineered for durability and safety with wide patio mullions for strength, and multi-point locking gears and recessed strike plates for security.
- Available Door Selections: NEW for 2014 Fiber-Classic® Mahogany Collection™, as well as Fiber-Classic® Oak Collection™ and Smooth-Star®.
- Available Sizes: 3'8"–8'10" widths in 6'6", 6'8" and 8'0" heights.
- Available Configurations: Single door with vented sidelites or double doors with vented sidelites for inswing applications.
- Glass Options: Fits the Therma-Tru® full-lite glass offering, which includes 16 decorative, specialty, Low-E and clear options.
- Lifetime limited warranty – doors and glass.
- Many ENERGY STAR® qualified options.
- Tru-Defense® Warranty Rider eligible when properly assembled and installed with all Therma-Tru® specified system components, in accordance with the Rider.

\*Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru Impact-rated product approval.

- Full system, 10-year limited warranty.
- Many ENERGY STAR® qualified options.
- Optional DP-50 Impact-rated product available.

## Therma-Tru® 2014 New Products

### NEW Fiber-Classic® Mahogany Collection™ Door & Sidelite Styles

Bring together the look you've envisioned for your home – inside and out – with the newest doors and sidelites to join the popular Fiber-Classic Mahogany Collection. Choose from a variety of entry, patio, house-to-garage and service door styles with deep Mahogany graining and high-definition panel embossments for all-around elegance.

#### Product Highlights

- Helps you extend and coordinate the hardwood touches you've chosen for your home.
- A durable and beautiful fiberglass alternative to wood and steel.
- Select the design you want and the performance you need with many decorative, privacy, specialty, Low-E and clear glass options.
- Add function with the option of vented sidelites.
- ENERGY STAR® qualified options for exceptional energy efficiency.
- Tru-Defense® eligible and backed by a full-system lifetime limited warranty.

See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on available product sizes and options, Tru-Defense Rider, limited warranties and exclusions, and ENERGY STAR® qualified products.

### NEW Camber Top Glass Shape for Fiber-Classic®, Smooth-Star®, Profiles™ & Traditions Doors

Introducing the ideal way to add handcrafted decorative, privacy or specialty glass to your home's entrance without compromising your sense of privacy – or your budget. The camber top glass shape offers exceptional value and is available in wood-grained, stainable and smooth, paintable doors to complement a variety of home and personal styles.

## Product Highlights

- Allows natural light into your home, while maintaining the sense of security that comes with the privacy of a solid-panel door.
- Versatile design can be used for front entry and service doors to coordinate the exterior look of your home.
- ENERGY STAR® qualified to deliver exceptional energy efficiency.
- Covered by Therma-Tru's lifetime limited warranty when installed in a fiberglass door system or 10-year limited warranty when installed in a steel door system.

## **NEW Internal Blinds Design & Low-E Option for Fiber-Classic®, Smooth-Star®, Profiles™, Traditions & Pulse® Doors**

Enjoy privacy with the simplicity and convenience of blinds sealed between glass. Therma-Tru's internal blinds feature a durable, user-friendly design that allows you to easily tilt, open or close the blinds in one smooth movement. And new Low-E glass options are ENERGY STAR® qualified for exceptional energy efficiency.

## Product Highlights

- Blinds are sealed between two panes of glass to eliminate the need for dusting.
- Cordless design delivers a clean, modern appearance, while offering a child- and pet-friendly privacy option with no dangling cords.
- Innovative cord-winding device helps prevent uneven blinds.
- Integrated privacy bar reduces sun glare and eliminates visibility into or out of the home.
- Energy-efficient Low-E glass option:
  - Can help save money on energy costs. In cold weather, Low-E glass reduces the loss of heat by reflecting the heat back inside the home. In warm weather, Low-E glass reflects the sun's rays off of the glass, keeping the interior of the home cool.
  - Can help prevent carpet and furnishings from fading in sunlight.
- Included in Therma-Tru's lifetime limited warranty when installed in a fiberglass door system or 10-year limited warranty when installed in a steel door system.

## **Simulated Divided Lites**

### **NEW Bars, Grid Patterns & Sizes for Fiber-Classic®, Smooth-Star®, Profiles™ & Traditions Doors**

Enhance your home's curb appeal with an eye-catching design option for your Therma-Tru® door. Simulated divided lites (SDLs) are designed to complement a variety of window and home styles, including Colonial- and Craftsman-inspired architecture. Create a custom look with an extensive portfolio of grid patterns, glass options and door styles to suit your personal style.

## Product Highlights

- Available in four privacy glass designs, Low-E and clear glass, as well as grilles between glass (GBGs) and flush-glazed doors and sidelites.
- Wood-grained or smooth-textured SDLs can be stained or painted to complement your door choice and home style.
- Create a more authentic divided lite look by layering SDLs over GBGs. Therma-Tru recommends applying SDLs over bronze GBGs with flat bars to achieve the most authentic divided lite look.
- Available in ENERGY STAR® qualified products, and included in the Therma-Tru® fiberglass door system lifetime limited warranty or 10-year limited warranty when installed in a steel door.

Note: SDLs are not recommended for use behind storm doors or to be painted dark colors, if exposed to direct sunlight.

## **Grilles Between Glass**

### **NEW Bars, Colors, Grid Patterns & Sizes for Fiber-Classic®, Smooth-Star®, Profiles™ & Traditions Doors**

Add character to your entry and patio doors with the convenience of grilles between glass. This eye-catching design feature from Therma-Tru is now available in 30 different grid patterns and sizes that can coordinate with window grid patterns, enhancing the overall look of your home.

## Product Highlights

- Create Traditional-, Craftsman- and Prairie-inspired looks with a variety of grid patterns, shapes and colors.
- Customize the look of your door to fit your home style. Choose from contour or flat grilles in five colors to complement wood-grained, stainable and smooth, paintable doors.
  - Standard Colors: White, Almond, Bronze
  - Special Quote Colors\*: Tan, Stone
- Grilles are thermally sealed between two panes of tempered glass, offering a low-maintenance, easy-to-clean divided lite option that adds character to your home.
- Available in ENERGY STAR® qualified products, and included in the Therma-Tru® fiberglass door system lifetime limited warranty or 10-year limited warranty when installed in a steel door.

\*Available in Special Quote Program.

## **Pulse®**

### **NEW Mahogany Grain & Echo Design Options**

Vintage style with modern appeal – that’s what the Pulse series of contemporary door styles and glass designs is sure to add to the entrance of your home. The already eclectic portfolio of Pulse door style options just got even more eye-pleasing with the addition of a Mahogany-grained fiberglass material, and new Echo design options for doors and sidelites.

## Product Highlights

- Designed to be fun and easy to mix and match, you can combine doors, sidelites and glass designs to make the bold statement you’ve chosen for your home.
- Upgrade a Mid-Century Modern Ranch- or Bungalow-style home from existing wood to more energy-efficient fiberglass doors.
- Pulse has a non-traditional look, yet is still engineered and constructed to Therma-Tru’s high standards for durability and reliability.
- Pulse doors and sidelites are available as ENERGY STAR® qualified and backed by a full-system limited warranty.

## **Cambridge™ Decorative Glass**

### **NEW Black Nickel Caming Option**

It’s an update to the style you’ve had your eye on, brought to you by the innovators at Therma-Tru. Black nickel caming is now available for Cambridge decorative glass, offering a striking accent to the curved bevels and textured field glass in this graceful and elegant design.

## Product Highlights

- Cambridge decorative glass features crystalline glue chip glass, clear curved bevels, double waterglass and now, black nickel caming, as well as brushed nickel and brass caming options.
- Beautiful design achieves a modest 8 out of 10 glass privacy rating.
- Available in more than a dozen glass shapes in Classic-Craft® Rustic Collection™, Classic-Craft® Oak Collection™ and Classic-Craft® Canvas Collection® premium entryways.

## **NEW Impact-Rated Salinas® Glass with Oceana Glass**

Protection and privacy, by design. Therma-Tru’s Impact-rated Salinas decorative glass is now available with textured Oceana glass for increased privacy. And while you enjoy the beauty of its delicate, wrought-iron design, you can also rest assured that it delivers enhanced protection in extreme weather conditions while providing added security.\*

### Product Highlights

- Choose from popular grained and smooth door styles that meet coastal region codes and regulations.
- Available in seven glass shapes for Fiber-Classic®, Smooth-Star®, Profiles™ and Traditions doors and sidelites.
- Reaches a 10 out of 10 – the highest level of opacity on the glass privacy rating scale.
- Features special laminated glass construction that helps protect the interior of the home.
- Impact Lip-lite frame is constructed of aluminum for superior durability.
- Passes a large missile impact test, preventing penetration of a 9 lb. 2" x 4" stud at 34 mph.

\*Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru Impact-rated product approval. Visit [www.thermatru.com](http://www.thermatru.com) for product approvals. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

### Same-Day® Stain

The look of authentic wood. The performance of fiberglass. Therma-Tru delivers the best of both worlds with Same-Day Stain. The easy-to-use, quick-drying formula gives professional-looking results in just a few simple steps. You'll create a finish that resists fading, bleaching and yellowing, and enjoy a beautiful door for years to come.

### Product Highlights

- Create consistent, clean results and a natural-looking finish with stain and topcoat formula specially formulated for Therma-Tru® fiberglass doors.
- Finish colors can be applied in a variety of shades to complement many home styles.
  - Available Finish Colors: Light Oak, Natural Oak, Walnut, English Walnut, Mahogany, Cedar, Cherry.
- All-inclusive kit contains everything needed to stain a Therma-Tru fiberglass double door system or a single door with two sidelites.\*
- Also available for purchase in individual cans.
  - Stain: 8 oz., 1 qt., 1 gal.
  - Topcoat: 20 oz., 1 gal.
- Backed by a 5-year limited warranty for Therma-Tru fiberglass doors.\*\*

\*Actual coverage may vary based on product selected, application method and desired appearance.

\*\*For Therma-Tru fiberglass doors. For complete details on the Same-Day Stain and topcoat limited warranty, go to [www.samedaystain.com](http://www.samedaystain.com) or ask your seller for more details.
