

## Therma-Tru introduces retractable screen door, adding natural light and fresh air to the home

[MAUMEE, OHIO, Jan. 21, 2022–] New for 2022, Therma-Tru introduces a retractable screen door solution with a discreet, hidden design, tested for compatibility with Therma-Tru’s full system.

The Therma-Tru retractable screen door allows fresh air and ample natural light into the home while keeping debris and insects out. Quality tested for compatibility with Therma-Tru entry door systems, the retractable screen door features a durable design that is built to last – featuring an aluminum track and housing that provide added strength and an aluminum sill plate assembly with slide adjustment that provides a secure fit.

“Now more than ever, homeowners are looking for ways to create a seamless transition between their indoor and outdoor living spaces,” said Mark Ayers, senior vice president of marketing and product development for Therma-Tru. “The retractable screen door provides that easy transition, while featuring the quality you’ve come to expect from Therma-Tru.”

The symmetrical design and neutral color options were selected to coordinate with or complement a home’s exterior and interior details. When paired with a Therma-Tru door, the retractable screen does not detract from the look of the entryway.

The Therma-Tru retractable screen fits many 6'8" and 8'0" inswing applications.
