

Therma-Tru to unveil ¾-Lite Shaker doors and sidelites at International Builders' Show

[DEERFIELD, ILLINOIS, February 12, 2026] Therma-Tru, the leader in complete entry and patio door system innovation, will introduce its new **¾-lite flush-glazed Shaker-style doors and sidelites** at the 2026 International Builders' Show (IBS), Booth #W3267, **Feb. 17–19** in Orlando.

"Shaker style continues to resonate because it's simple, versatile and timeless," said Eric Dotson, vice president, product management for outdoors B2B at Fortune Brands. "Our new ¾-lite Shaker doors and sidelites give builders and homeowners more design flexibility at the front entry, balancing natural light, curb appeal and the proven performance they expect from Therma-Tru door systems."

Expanding on the success of the Shaker portfolio, the new ¾-lite design captures the clean lines homeowners favor, while allowing in more sunlight. Available in Therma-Tru Fiber-Classic and Smooth-Star 1-panel doors, its balanced profile and versatile styling complement a variety of architectural and decorative elements, including Craftsman, Coastal and other popular design influences. Privacy and textured, energy-efficient Low-E glass, along with divided lite styles, round out the selection.

Doors and sidelites come in 6'8" and 8' sizes and feature composite top and bottom rails and edge stiles with Tru-Guard composite technology, providing advanced protection from water absorption, mold and wood-ingesting insects on all six sides of the door. Backed by a lifetime limited warranty, its durable, long-lasting fiberglass skins won't warp, rot, dent or rust, and require very little maintenance.

Therma-Tru will also showcase the complete door system line-up at IBS, including its Veris Entryway Systems, which offer extensive customization options across operation, size, configuration, style and privacy. Veris brings together high-end style and unique functionality to create contemporary openings that become experiences. Engineered for easy, worry-free operation and designed with the highest quality aluminum, stainless steel and polymer components which provide long-lasting operation that's virtually maintenance-free.

Booth #W3267 will also display Therma-Tru sister brands Larson (storm doors), Fiberon (decking, railing and cladding), Fypon (decorative millwork) and Solar Innovations (custom glass doors, windows and structures), featuring a legacy of more than 200 combined years of material science expertise and product innovation.
