## Entry & Patio Door Systems

Home begins at the door.

## Therma-Tru. You're in expert hands.

Welcome to Therma-Tru, the most preferred brand of exterior doors. Year after year, building professionals rank Therma-Tru #1 – as the brand they use most – in entry doors.\* It's a reputation built on more than 50 years of experience and technical know-how. Therma-Tru introduced the world to fiberglass doors and continues to make door systems that are held to high standards for quality and performance.

That's where the beauty of choosing Therma-Tru begins.

### Why Therma-Tru® Fiberglass Doors

Your Therma-Tru fiberglass door system delivers long-lasting beauty, durability and energy efficiency.

#### Beautiful

- Offers endless choices in door styles and handcrafted decorative glass designs.
- Gives the authentic look and feel of real wood.

#### Low-Maintenance

- Built from a material that won't dent or rust, nor will it warp, split, crack or rot.
- Requires less work than wood or steel to keep your door looking "new" longer.\*\*

#### Energy-Efficient

- Solid polyurethane foam core provides up to four times the insulating R-Value of wood.\*\*\*
- Most decorative and privacy glass features triple-pane construction for reduced outside noise and increased energy efficiency.

#### Durable

- Provides homes with weather resistance, as well as long-lasting curb appeal.
- Engineered to work together as a complete door system for uncompromising quality, inside and out.

Before

## Increase Curb Appeal & Value

We all want to get the most out of every dollar we spend, and installing an attractive new front entrance is a cost-effective way to improve your home's curb appeal and perceived value. In fact, a study conducted by an independent research company found that a home with an enhanced Therma-Tru® entry door system added to its perceived value by as much as five times the cost of the door itself.\*

Smooth-Star, Blackstone Glass, Door – S6002, Sidelites – S6002SL

\*Therma-Tru's "National Home Valuation Study" was commissioned by Therma-Tru in 2002 and conducted by TNS, an independent provider of Internet-based research and research-based marketing information and counsel.

## Turn a vision into a reality.

Designing and visualizing your new entrance is easier than ever with the DoorWays™ App from Therma-Tru. Choose from a wide selection of fiberglass door and glass combinations to create an entrance that fits your style. Then use the camera to try it out on your own home.

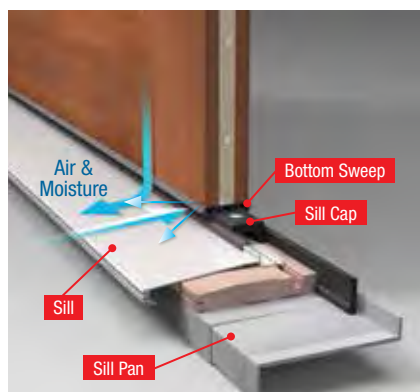

### Build Your Door

Research and shop for doors from the convenience of our website at [www.thermatru.com](http://www.thermatru.com).

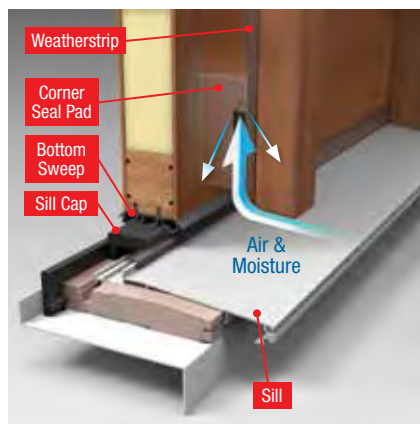

# Engineered to Work Together

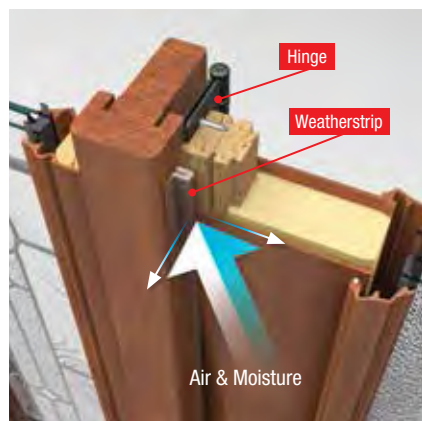

Our complete door systems feature doors, glass and components engineered to work together to resist leaks and drafts, and help maintain energy efficiency and weather resistance.

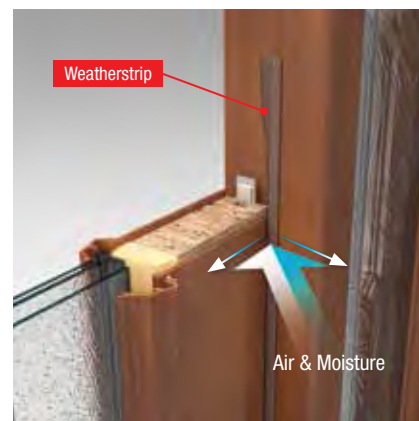

**1 Sill and bottom sweep** form a tight seal against wind-driven moisture infiltration at the bottom of the door system and help channel moisture away from the home. **Sill pan** (recommended) adds an extra layer of protection to help keep moisture away from the subfloor.

**2 Corner seal pads** (inswing only) complete the seal between the **sill cap**, **bottom sweep** and **weatherstrip** to help block potential pathways where wind-driven moisture can infiltrate the bottom corner of the door system.

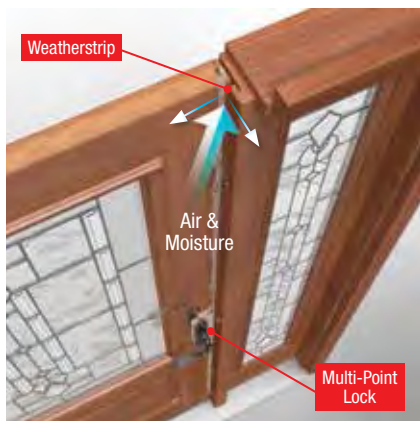

**3 Hinges** position the **door** to properly compress the **weatherstrip** to help form a tight, even seal against air and moisture infiltration when the door closes.

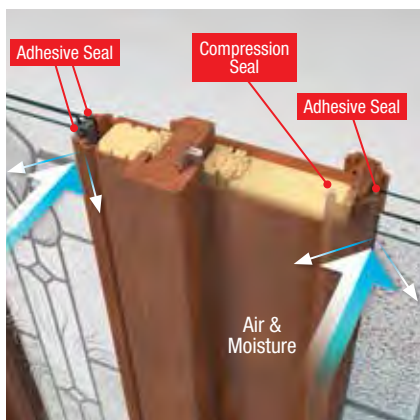

**4 Weatherstrip** is specifically engineered in a variety of profiles to provide the best possible fit with our door systems, helping to deliver a precise seal between the **door** and **frame**.

- 5 Multi-point locking system** (recommended) engages the **door** and **frame** at three points from top to bottom, helping to preserve the **weatherstrip's** seal even under wind pressure.

- 6 Lip-lite frame** (shown right) features a **compression seal** against weather on the outside of the **door** and an **adhesive seal** against weather on the outside of the **glass**. **Flush-glazed glass** (shown left) is built directly into the door without a Lip-lite frame, featuring a **high-performance adhesive weather seal** inside and out.

## A Complete Door System

More than beautiful doors and glass; a complete door system includes the components used to assemble it. We manufacture or specify every aspect of a complete door system. The Therma-Tru<sup>®</sup> genuine components shown here are our premium options for long-lasting durability.

**Composite Adjustable Sills** ❖

Inswing and outswing composite sills resist rotting and insects. Inswing adjustable sills help to maintain a tight seal over time.

**Dual-Bulb / Dual-Fin Bottom Sweeps** ❖  
(Inswing Only)

A dual-bulb, dual-fin design helps maintain tight contact with adjustable sill caps and creates added barriers against moisture.

**7-Shape Corner Seal Pads** ❖  
(Inswing Only)

Innovative options include our patented jamb assembly, featuring the 7-shape corner seal pad which creates an air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

**Removable Weatherstrip** ❖

Resilient design compresses when closed and springs back when open, protected by a durable jacket, for long-lasting sealing power.

**Multi-Point Locking Systems** ❖ (Recommended)

Increased engagement between door and frame enhances stability and the homeowner's sense of security.  
(Highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.)

**Ball-Bearing Hinges** ❖

Hinges with ball bearings protecting each hinge pivot, or "knuckle", offer added support and stability.  
(Recommended for Classic-Craft<sup>®</sup> doors, 8'0" doors, doors with glass, and Impact- and Fire-rated fiberglass doors.)

**Frame Components**

Check with your Therma-Tru seller for options to complete the door system, including rot-resistant brickmould, jambs, mullions and coil cladding manufactured to our specifications.

Additional components:

Sill Pans ❖, Rain Protection ❖, Strike Plate and Astragals ❖.

### Tru-Defense: The Ultimate Protection

Therma-Tru fiberglass doors are available with our exclusive Tru-Defense<sup>®</sup> system, which integrates specific components engineered and tested to deliver outstanding protection in all kinds of weather conditions. And it's backed by a Warranty Rider that provides for cash reimbursement that may be used toward secondary damage to flooring and trim, and the labor to make repairs if water infiltration occurs.\* Look for the (❖) icon. For details, visit [www.thermatru.com/trudefense](http://www.thermatru.com/trudefense).

#### Water Infiltration Cash Reimbursement Limit

Latch and Deadbolt Lock with Standard Assembly:	\$250
with a Therma-Tru Sill Pan:	\$500
Multi-Point Lock with Standard Assembly:	\$750
with a Therma-Tru Sill Pan:	\$1,500
Multi-Point Lock with NAFS-Certified Door System:	\$1,000
with a Therma-Tru Sill Pan:	<b>\$2,000</b>

\*For full details on the Tru-Defense Warranty Rider, visit [www.thermatru.com/trudefense](http://www.thermatru.com/trudefense). The Rider does not warrant workmanship of anyone who assembles or installs a Tru-Defense door system, nor any damages caused by improper handling, assembly or installation.

# Door Selections

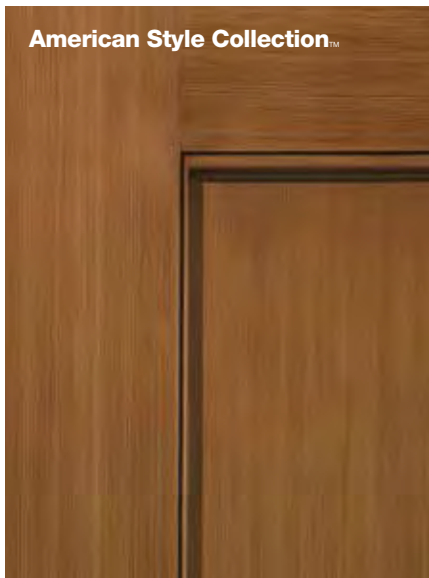

The beauty of a Therma-Tru® door is easy to see, no matter how you look at it. What makes our doors even more beautiful? Choice. Wood-grained, stainable or smooth, paintable surfaces. A world of inspired glass designs. Fiberglass **or steel**.

## Classic-Craft® Collections

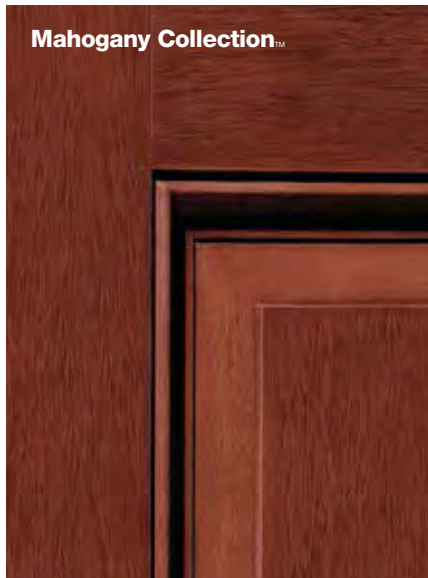

Here's a premium entryway that can truly express your personal style. Whether Rustic, Classic or Contemporary, you'll find a Classic-Craft premium entryway that fits beautifully with your personal style and home.

**American Style Collection™**

**Mahogany Collection™**

**Rustic Collection™**

**Oak Collection™**

**Canvas Collection™**

Rated a *Consumers Digest* Best Buy for its exceptional warranty, quality of materials and construction, and resemblance to a real wood door.

### The look of real wood.

Realistic wood grains that are virtually indistinguishable from high-grade wood doors, thanks to Therma-Tru's AccuGrain® technology.

### Details that define a custom door.

Crisp, handcrafted elegance creates embossments that are deeper than standard fiberglass doors.

### Architecturally correct for true classic beauty.

Up to 25% wider panels\*

**Classic-Craft Premium Door**

**Standard Fiberglass Door**

\*Compared to other standard fiberglass doors.

Note: Finish colors may vary from an actual application due to fluctuations in finishing or printing. See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions.

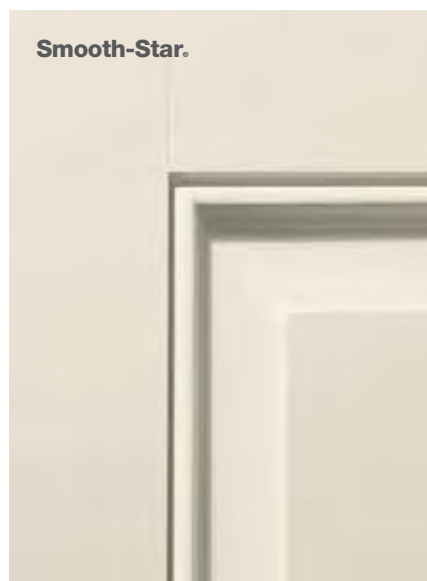

## Fiber-Classic® Collections

The industry's first fiberglass door delivers the look and feel of real Mahogany and Oak with excellent performance and value.

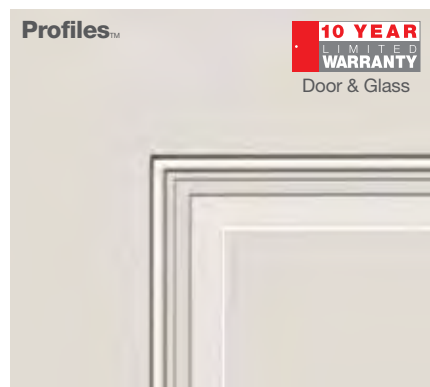

## Smooth-Star®

A smooth, ready-to-paint fiberglass door that offers excellent performance and value.

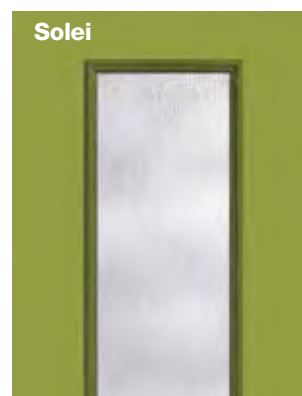

## Steel

Bring style and affordability together to create very attractive results with our steel doors.

## Pulse®

Pulse is form *and* function. Sleek, modern designs and retro glamour in entrances that perform to our standards.

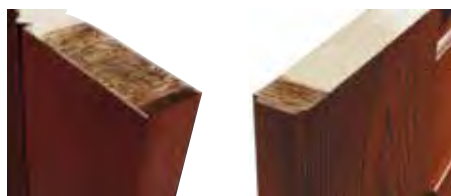

# Classic-Craft® Premium Entryways

A premium entryway that's truly unique and uncompromising in every detail. One that blends precision-engineered features with architecturally correct details to produce an entryway that performs as exceptionally as it looks – instilling confidence and peace of mind. And it's rated a *Consumers Digest* Best Buy for its exceptional warranty, quality of materials and construction, and resemblance to a real wood door.

Compare for yourself.

**Premium – right down to the edge.**

A solid hardwood square edge delivers a genuine wood appearance.

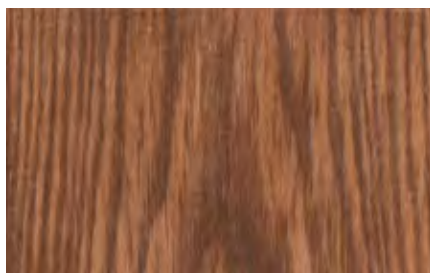

**Standard fiberglass bullnose edge.**

The bullnose profile, typical of other fiberglass doors, detracts from the authentic wood look.

**Architecturally correct for true classic beauty.**

Doors designed to be architecturally correct, with proportions modeled after classic architectural principles, to create a more premium entryway.

Up to  
25% wider  
panels\*

**The look of real wood.**

Realistic wood grains that are virtually indistinguishable from high-grade wood doors, thanks to Therma-Tru's AccuGrain® technology.

**Classic-Craft Premium Door**

**Standard Fiberglass Door**

**Details that define a custom door.** Crisp, handcrafted elegance creates embossments that are deeper than standard fiberglass doors.

\*Compared to other standard fiberglass doors.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions.

# Doors come to life with Therma-Tru® glass.

A Therma-Tru door system with decorative glass can create an entrance that makes a statement — one that says you have high standards for style, quality and craftsmanship.

- Numerous glass colors, textures, shapes and coming options are available to complement any Therma-Tru door.
- Our glass designs are researched in the market to ensure they are highly rated in consumer preference.
- Our decorative glass is handcrafted and built with all-glass bevels for premium quality.
- Our glass designs offer varying levels of privacy and light to suit your needs.
- All Low-E and clear glass panels are tempered to provide added safety.

## Classic-Craft® Premium Entryways

- An exclusive collection of decorative glass families.
- Close attention to detail produces truly distinctive designs you won't find anywhere else.
- More than 10% wider glass\* welcomes more light into the home and creates a distinctive entryway.
- Fiberglass lite frames are made with the same material as the door to blend seamlessly with the rest of the entryway when stained or painted.
- All sidelites are made with flush-glazed glass for a truly seamless, consistent appearance.
- All clear glass options are Low-E, providing long-term energy efficiency.

**More than 10% wider glass\***

**Classic-Craft  
Premium Glass**

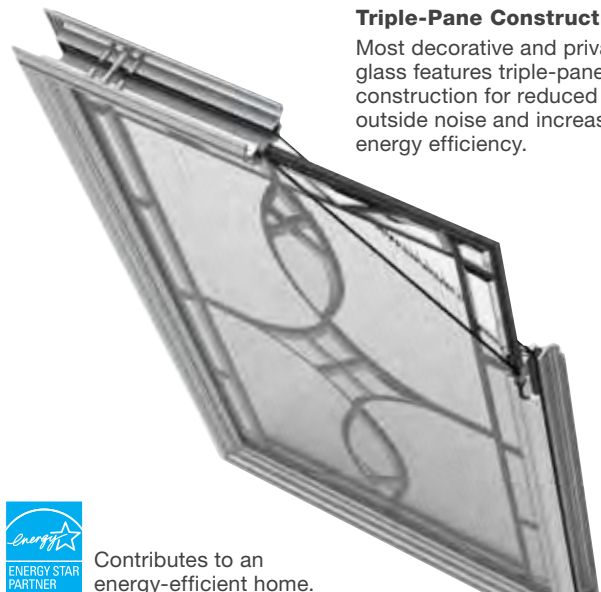

**Standard Glass**

## Fiber-Classic® & Smooth-Star® Doors

- A portfolio of interchangeable decorative glass designs.
- Standard 22" glass width with Lip-lite frame and flush-glazed options with 25"-27" glass width invite light into the home for a more brilliant interior.
- Lip-lite frames are heat and fade resistant, and suitable for use with a storm door.
- Low-E glass is available for internal blinds, divided lites and clear glass, providing exceptional energy efficiency.

### Triple-Pane Construction

Most decorative and privacy glass features triple-pane construction for reduced outside noise and increased energy efficiency.

Contributes to an energy-efficient home.

\*Compared to other standard fiberglass doors.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on ENERGY STAR qualified products.

# Uncompromising quality, inside and out.

A Therma-Tru® door with genuine Therma-Tru components is more than a beautiful door – it's a complete door system. Each part of the system – from the glass to the hinges – is engineered to work together for weather resistance and energy efficiency.

And Therma-Tru can stand behind more parts of a door system for longer than other door companies because Therma-Tru makes or specifies everything that goes into it. A Therma-Tru fiberglass door system is backed by the industry's most comprehensive lifetime limited warranty.

## Backed by our lifetime limited warranty.

### Therma-Tru. Fiberglass Doors

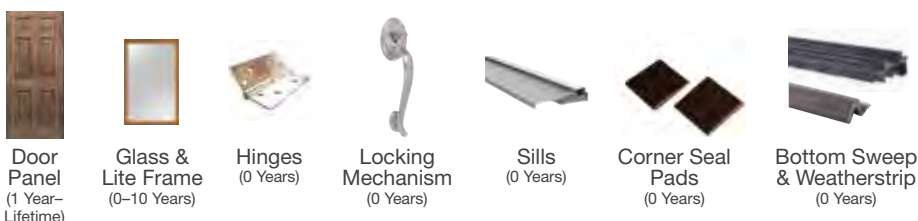

All of these genuine Therma-Tru components are included in our lifetime limited warranty.\* The homeowner has one source, Therma-Tru, to turn to if an issue arises with the door system.\*\*

### Our Lifetime Limited Warranty

### Other Fiberglass & Wood Doors

Other companies that only supply the door panel either don't warrant as many parts of the door system or warrant them for a shorter period. That could leave the homeowner without coverage and confused about who to turn to if issues arise.

### Other Door Companies' Warranties

## Engineered to work together.

Door – CCR20022, Sidelites – CCR3412SL

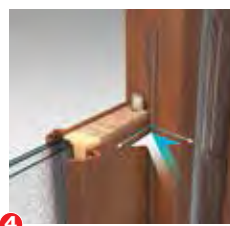

**Sill and bottom sweep** form a tight seal against wind-driven moisture infiltration at the bottom of the door system and help channel moisture away from the home. **Sill pan** (recommended) adds an extra layer of protection to help keep moisture away from the subfloor.

wind-driven moisture can infiltrate the bottom corner of the door system.

**Hinges** position the **door** to properly compress the **weatherstrip** to help form a tight, even seal against air and moisture infiltration when the door closes.

**Weatherstrip** is specifically engineered in a variety of profiles to provide the best possible fit with our door systems, helping to deliver a precise seal between the **door** and **frame**.

**Multi-point locking system** (recommended) engages the **door** and **frame** at three points from top to bottom, helping to preserve the **weatherstrip's** seal even under wind pressure.

**Lip-lite frames** (shown on the right) feature a **compression seal** against weather on the outside of the **door** and an **adhesive seal** against weather

on the outside of the **glass**. **Flush-glazed glass** (shown on the left) is built directly into the door without a Lip-lite frame, featuring a **high-performance adhesive weather seal** inside and out.

\*Excluding primed Pine and Oak frame components.

\*\*Excluding improper assembly of components into a door system by the distributor, dealer, builder or remodeler, and the installation of the door system.

\*\*\*Excluding installations within 5 miles of a body of salt water and the finish.

\*\*\*\*Excluding normal wear and tear.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions.

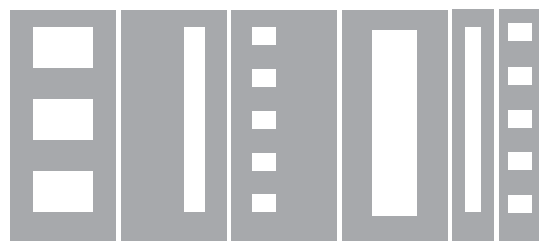

Modern design.  
Upbeat living.

## It's your decision, by design.

Pulse is geometry with energy. Designed to be fun and easy to mix and match with sleek, flush door and sidelite styles, you can create a modern entrance without missing a beat. Explore all the possible combinations.

### 1 Start with a STYLE.

Combine doors and sidelites to create an entrance that fits your vision.

## Finish Options

## Entry Handling (View from Outside Home)

\*Multi-point locking system is available by special order. Please allow 3–5 weeks for shipping.

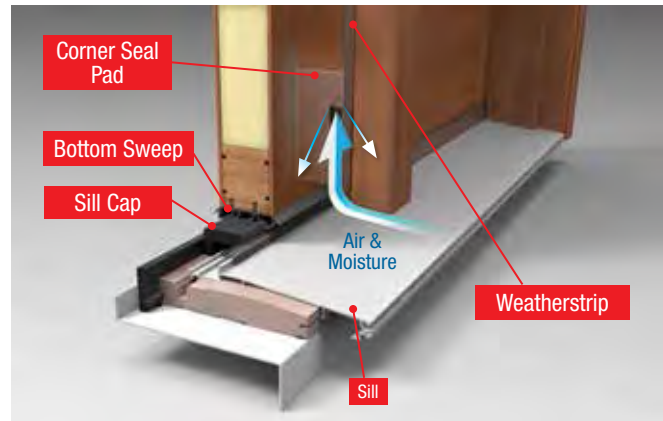

Note: Finish colors may vary from an actual application due to fluctuations in finishing or printing.

# Engineered to Work Together

Our complete door systems feature doors, glass and components engineered to work together to resist leaks and drafts, and help maintain energy efficiency and weather resistance.

- 1 Sill and bottom sweep** form a tight seal against wind-driven moisture infiltration at the bottom of the door system and help channel moisture away from the home. **Sill pan** (recommended) adds an extra layer of protection to help keep moisture away from the subfloor.
- 2 Corner seal pads** (inswing only) complete the seal between the **sill cap**, **bottom sweep** and **weatherstrip** to help block potential pathways where wind-driven moisture can infiltrate the bottom corner of the door system.
- 3 Hinges** position the **door** to properly compress the **weatherstrip** to help form a tight, even seal against air and moisture infiltration when the door closes.
- 4 Weatherstrip** is specifically engineered in a variety of profiles to provide the best possible fit with our door systems, helping to deliver a precise seal between the **door** and **frame**.
- 5 Multi-point locking system** (recommended) engages the **door** and **frame** at three points from top to bottom, helping to preserve the **weatherstrip's** seal even under wind pressure.
- 6 Lip-lite frame** features a **compression seal** against weather on the outside of the **door** and an **adhesive seal** against weather on the outside of the **glass**. **Flush-glazed glass** is built directly into the door without a Lip-lite frame, featuring a **high-performance adhesive weather seal** inside and out.

## A Complete Door System

### Composite Adjustable Sills

Inswing and outswing composite sills resist rotting and insects. Inswing adjustable sills help to maintain a tight seal over time.

### Dual-Bulb / Dual-Fin Bottom Sweeps

(Inswing Only) A dual-bulb, dual-fin design helps maintain tight contact with adjustable sill caps and creates added barriers against moisture.

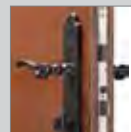

### 7-Shape Corner Seal Pads

(Inswing Only) Innovative options include our patented jamb assembly, featuring the 7-shape corner seal pad which creates an air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

### Removable Weatherstrip

Resilient design compresses when closed and springs back when open, protected by a durable jacket, for long-lasting sealing power.

### Multi-Point Locking Systems

(Recommended) Increased engagement between door and frame enhances stability and the homeowner's sense of security. (Highly recommended for 8'0" and double fiberglass doors. Not recommended for **steel doors**.)

### Ball-Bearing Hinges

Hinges with ball bearings protecting each hinge pivot, or "knuckle", offer added support and stability.

(Recommended for Classic-Craft® doors, 8'0" doors, doors with glass, and **Impact- and Fire-rated** fiberglass doors.)

### Frame Components

Check with your Thermo-Tru seller for options to complete the door system, including rot-resistant brickmould, jambs, mullions and coil cladding manufactured to our specifications.

Additional components:

Sill Pans, Rain Protection, Strike Plate and Astragals.

## Classic-Craft® Oak Collection™

## Fiber-Classic® Mahogany Collection™

## Fiber-Classic® Oak Collection™

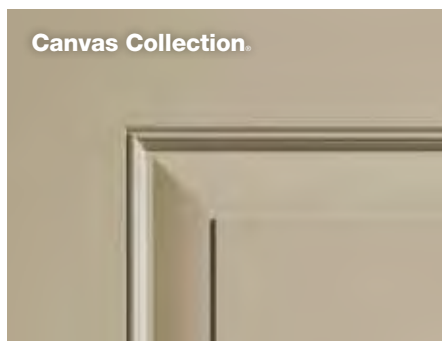

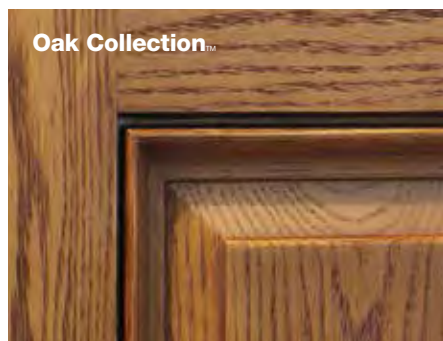

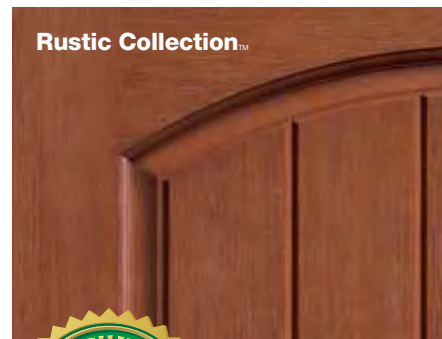

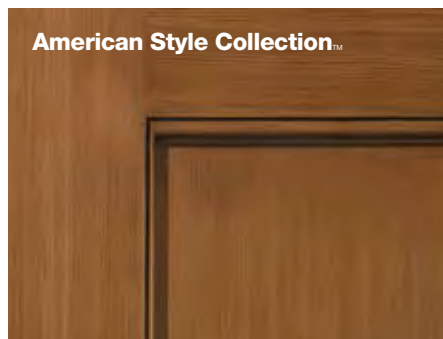

Note: Finish colors may vary from an actual application due to fluctuations in finishing or printing. See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions.

# Door Selections

The beauty of a Therma-Tru® door is easy to see, no matter how you look at it. What makes our doors even more beautiful? Choice. Wood-grained, stainable or smooth, paintable surfaces. A world of inspired glass designs. Fiberglass **or steel**.

## Classic-Craft® Collections

Here's a premium entryway that can truly express your personal style. Whether Rustic, Classic or Contemporary, you'll find a Classic-Craft premium entryway that fits beautifully with your personal style and home.

Rated a *Consumers Digest* Best Buy for its exceptional warranty, quality of materials and construction, and resemblance to a real wood door.

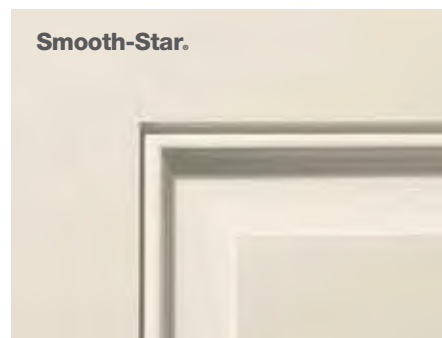

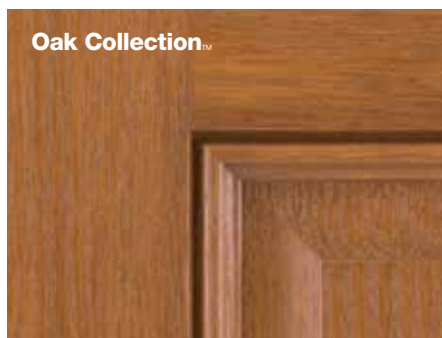

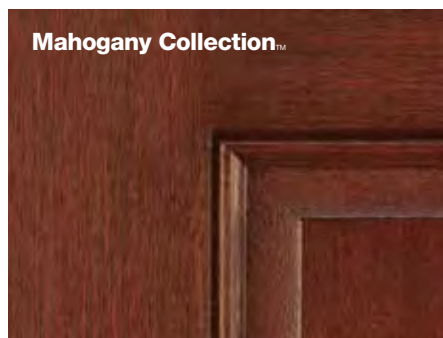

## Fiber-Classic® Collections

The industry's first fiberglass door delivers the look and feel of real Mahogany and Oak with excellent performance and value.

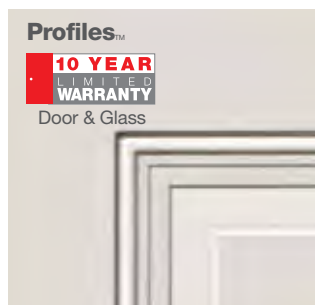

## Smooth-Star®

A smooth, ready-to-paint fiberglass door that offers excellent performance and value.

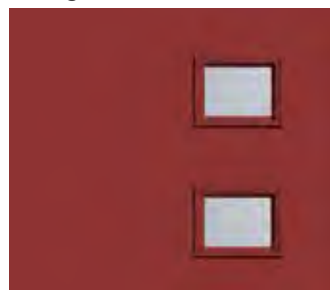

## Steel

Bring style and affordability together with our steel doors.

## Pulse®

Pulse is form *and* function. Sleek, modern designs and retro glamour in entrances that perform to our standards.

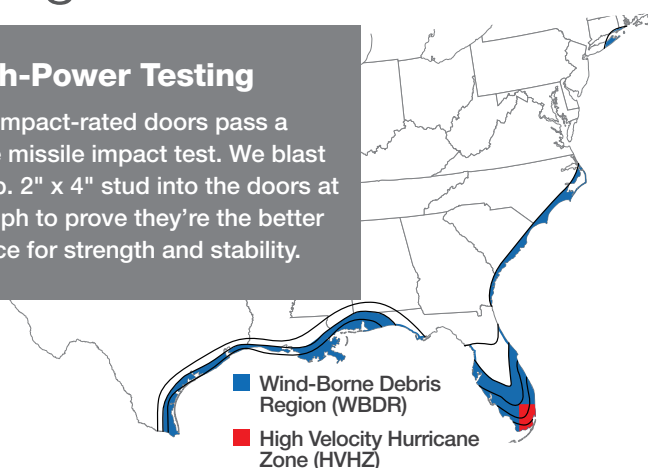

Note: Finish colors may vary from an actual application due to fluctuations in finishing or printing. See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for details on limited warranties and exclusions.

# Tough When You Need It. Beautiful Always.

## High-Power Testing

Our Impact-rated doors pass a large missile impact test. We blast a 9 lb. 2" x 4" stud into the doors at 34 mph to prove they're the better choice for strength and stability.

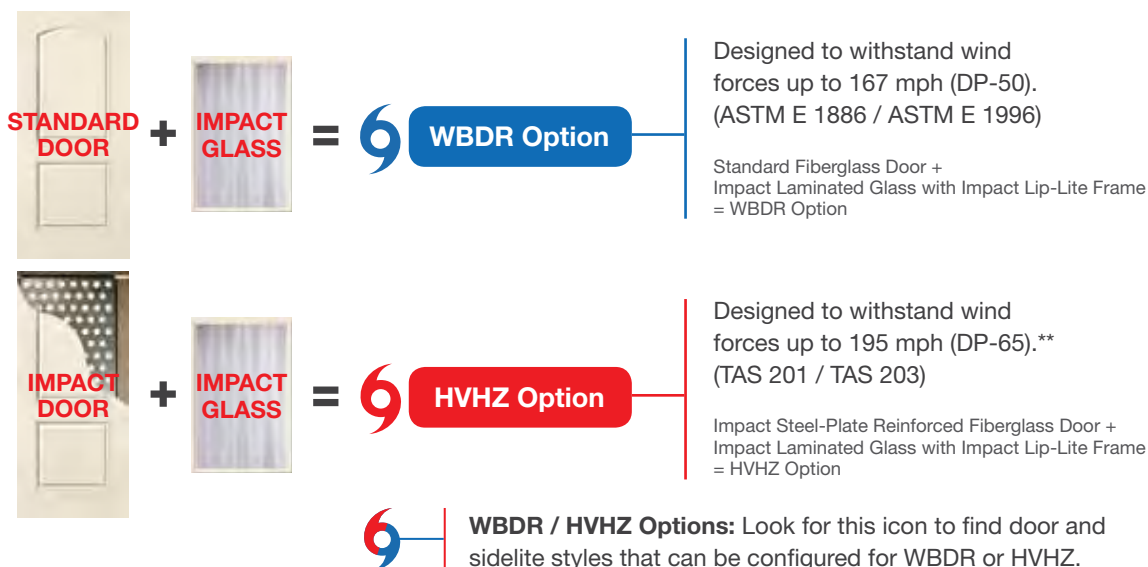

## Impact-Rated Products

Therma-Tru offers Impact-rated doors and glass that can be used to meet high-wind and coastal region codes and regulations, offering excellent performance in extreme weather conditions while providing added protection.

### 1 Use the map as a guide to find out if you need product for WBDR or HVHZ.

Always confirm building code requirements in your area before buying.\*

### 2 Use the icons to find available Therma-Tru® product options in this catalog.

### 3 Verify that there is a Therma-Tru product approval specific to your area for the door system configuration before buying.\*

### 4 Make sure the product is installed in compliance with the product approval to meet building codes.

The performance of the door system depends on how it is installed. Proper installation is required to comply with building codes.

## Impact Doors

Feature a built-in 24-gauge steel plate lining.

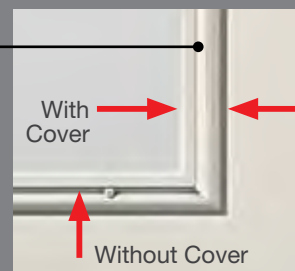

## Impact Glass

Features special laminated glass construction.

## Impact Lip-Lite Frame

Features durable, paintable aluminum construction with a screw channel cover to help hide unsightly screws.

\*Product approvals show that the door system meets applicable codes when selected, assembled and installed as instructed.

\*\*Impact and structural performance of a single Therma-Tru fiberglass door with a steel plate lining and a Therma-Tru multi-point locking system.

Note: See your Therma-Tru seller or visit [www.thermatru.com](http://www.thermatru.com) for product approvals and installation instructions. Always confirm building code requirements in your area before buying. Follow weather and news reports to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

# Door Construction

Therma-Tru® fiberglass doors offer the authentic look of wood. It's virtually impossible to tell the difference. But the beauty goes beyond skin deep. We combine craftsmanship and innovation to build our doors for long-lasting energy efficiency, durability and security.

## Classic-Craft® Premium Entryways

### 1 Enhanced Weather Resistance

No more worries about rotting, warping or twisting. Classic-Craft premium entryways are tested and designed to resist extreme weather conditions and the damaging effects of moisture. Both the top and bottom of the door are protected by composite rails for a longer-lasting entryway.

### 2 Solid Security

Classic-Craft premium entryways feel solid and close with authority. A 4- $\frac{1}{8}$ " wide beam of engineered lumber runs from the top to the bottom of the locking side of the door to add mass and rigidity, giving the door weight and a natural wood feel.

### 3 Excellent Durability

Built to stand up to the elements and years of wear, Classic-Craft's fiberglass skins are thicker than other standard fiberglass doors to provide added durability and better long-term performance.

### 4 Higher R-Values

Classic-Craft premium entryways contribute to an energy-efficient home. A polyurethane foam core provides up to four times the insulating R-Value of wood.\*

### 5 Edge-to-Edge Moisture Protection

Resist moisture at every turn – and along every edge. Classic-Craft premium entryways have hardwood and composite edges that help prevent moisture penetration.

## Fiber-Classic® & Smooth-Star® Doors

### 1 Weather Resistance

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

### 2 Security

An enhanced lock block combined with 1- $\frac{1}{4}$ " engineered lumber lock and hinge stiles increase rigidity and stability.

### 3 Durability

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

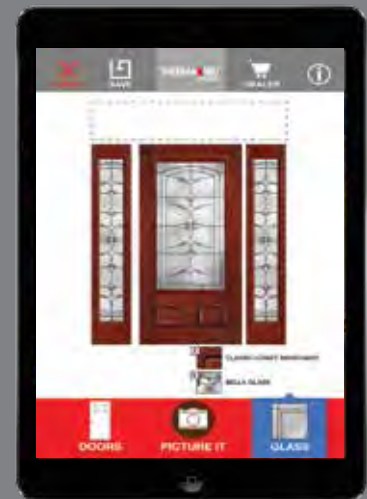

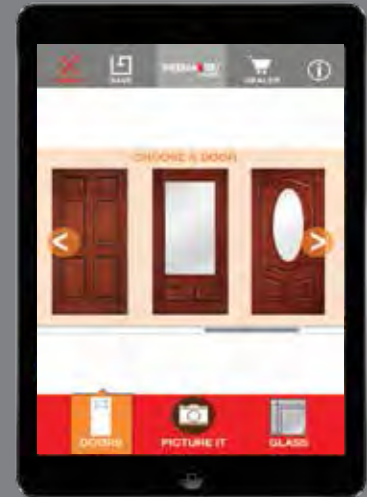

### 4 R-Values

Built with a polyurethane foam core, Therma-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency, offering up to four times the insulating R-Value of wood.\*

\*Comparison of fiberglass to wood doors (both without glass).

Get the DoorWays™ App and start turning your visions of a great entrance into a reality.

## Turn a vision into a reality.

Designing and visualizing your new entrance is easier than ever.

The simple interface of the DoorWays App from Therma-Tru allows you to:

- Choose from a wide selection of fiberglass door and glass combinations to create an entrance that fits your style.
- Save multiple door options with product information automatically included for easy lookup.
- Share your favorite looks with friends via email, text and Facebook.
- Use your camera to try out different door and glass combinations on your own home.
- Save photos to your camera roll to use and share later.

## The Beauty of Nature The Performance of Synthetics

Fypon has combined nature's beauty with the performance of moulded high-density polyurethane — resulting in products that feature rich, authentic textures and provide a lightweight, low-maintenance alternative to traditional building materials.

The true beauty of these products is their ability to weather the elements. Unlike traditional building materials, our polyurethane products resist warping, splitting, moisture and insect infestation, giving you the peace-of-mind of a low-maintenance product.
