

## Therma-Tru introduces new Pembridge™ and Geometric glass designs

*Pembridge™ Decorative Glass*

*Geometric Privacy and Textured Glass*

MAUMEE, OHIO – Two new glass options from Therma-Tru® Doors enhance a homeowner's opportunity to bring natural light into the home while balancing privacy and their unique style.

Geometric patterns, reflected in both new glass designs, are an eye-catching trend and quickly making the leap from Modern- or Transitional-style homes to every home style.

### **Pembridge™ Decorative Glass**

Pembridge decorative glass delivers a modern twist on a traditional look and features a simplistic diamond theme that draws the eye to the center of the design. Homeowners can choose from three coming options: black nickel, brushed nickel or brass. Pembridge decorative glass can be used in Therma-Tru's Fiber-Classic®, Smooth-Star®, Profiles™ and Traditions product lines, as well as Pulse® doors and sidelites.

"Pembridge delivers simple sophistication with a timeless design," said Donna Contat, director of product management at Therma-Tru Corp. "It's the perfect complement to any home."

The decorative glass design pairs especially well with Traditional, Modern Tudor and Colonial architectural elements for a front entry that delivers simple elegance, visual depth and relaxed formality.

### **Geometric Privacy and Textured Glass**

Therma-Tru's new Geometric glass offers a distinctly modern design that is expressive yet simple. Geometry is brought to life through the use of small, sleek cubes in a design that delivers multidimensional privacy.

"Geometric glass expands our popular privacy and textured glass category," said Contat. "It features an on-trend, highly visual texture."

Geometric glass can be used in Therma-Tru's Fiber-Classic, Smooth-Star, Pulse, Profiles and Traditions product lines. It's also available in select Classic-Craft® styles.
